

Policy Advisory Committee Meetings

- Reading Materials from Gartner on issues that affect IT policy and strategy in UF/IFAS.

Materials are presented as relevant questions and providing short answers. (Note: These materials are available only to individuals that qualify as users as defined in the Gartner-UF agreement. (You need to have an IFASDOM username and password to access the material)

Document 1:

1. What organizational, social and technological trends will drive the evolution of IT?
2. Which advances will trigger a revolutionary leap, rather than an evolutionary crawl, in the power of IT?
3. What new applications and business opportunities will result from evolving IT capabilities?

Document 2:

1. What changes in the end-user computing landscape will cause traditional procurement and deployment strategies to fail?
2. What new strategies will be most effective in exploiting the changes in the end-user landscape?

Document 3:

1. What are the drivers behind the growing movement to distributed learning and collaboration, and what are the options facing higher-education institutions?
2. How will higher-education institutions acquire or build the management information systems necessary to support IT changes and the way institutions will conduct the business of higher education in the 21st century?

3. What must higher-education institutions do to resolve IT leadership and staffing problems?

Document 4:

1. Why all the hype about IT governance in government?
2. How do you create a model for IT governance in the public sector?
3. What is the role of an effective IT council?
